## Language Learning

Three Principal Characteristics

1. It takes its principles from the "Counseling Learning Approach" developed by Charles A. Curran.
2. It was created especially for Adult Learners who might fear to appear foolish; so the teacher becomes a Language Counselor, he understands them and leads them to overcome their fears.
3. It follows Krashen's Monitor Theory (Affective Filter Hypothesis) and the Cognitive Theory where the human mind is active.

How it works in the classroom

- Stage 1 - Reflection
- Stage 2 - Recorded conversation
- Stage 3 - Discussion
- Stage 4 - Transcription
- Stage 5 - Language analysis
